

### Sexual Health Education

The Riverview School District board of directors is authorized by law to determine whether sexual health education instruction will be offered in the district. The board has determined that such a program will be offered to students, consistent with state law.

Sexual health education instruction offered by the district will be medically and scientifically accurate, age appropriate, appropriate for students regardless of gender, race, disability status, or sexual orientation, and include information about abstinence and other methods of preventing unintended pregnancy and sexually transmitted diseases. Abstinence will not be taught to the exclusion of other instruction on contraceptives and disease prevention. The district's sexual health education program will be consistent with the 2005 *Guidelines for Sexual Health Information and Disease Prevention* developed by the Department of Health and the Office of Superintendent of Public Instruction.

I. The district's program will provide sexual health education as defined by the Healthy Youth Act:

A. Sexual health education:

1. The physiological, psychological and sociological developmental processes experienced by an individual;
2. The development of intrapersonal and interpersonal skills to communicate respectfully and effectively to reduce health risks and choose healthy behaviors;
3. Health care and prevention resources;
4. The development of meaningful relationships and avoidance of exploitive relationships; and
5. Understanding of the influences of family, peers, community and the media throughout life on healthy sexual relationships.

B. Medically and scientifically accurate:

Medically and scientifically accurate, as defined by the Healthy Youth Act, is information that is verified or supported by research in compliance with scientific methods, is published in peer review journals, where appropriate, and is recognized as accurate and objective by professional organizations and agencies with expertise in the field of sexual health including but not limited to, the American College of Obstetricians and Gynecologists, the Washington State Department of health (DOH), and the Federal Centers for Disease Control and Prevention.

C. 2005 Guidelines for Sexual health and Disease Prevention:

A publication by the DOH and the Office of Superintendent of Public Instruction (OSPI) that provides the fundamental framework for establishing a medically and scientifically accurate sexual education program for students. A copy of the *Guidelines for Sexual Health Information and Disease Prevention* is located on the DOH and OSPI websites.

II. Adoption of a Sexual Health Education Program

School districts will involve parents and school district community groups in the planning, development valuation and revision of any instruction in sexual health education offered as a part of the school program.

The district must ensure that all instructional materials are medically and scientifically accurate. The DOH is available to provide technical assistance in determining medical and scientific accuracy. When choosing curriculum the district staff may examine the list of materials reviewed for medical and scientific accuracy that are located on the DOH website at [www.doh.wa.gov](http://www.doh.wa.gov).

In determining curriculum, the district staff may review the OSPI's list of commonly used sexual health education curricula that were reviewed for their alignment with the guidelines. Although the list is not exhaustive, the list is updated annually and is posted on the OSPI website at [www.k12.wa.us](http://www.k12.wa.us). Staff may also apply the OSPI Sexual Health Education Alignment tool to curriculum under consideration as a resource in assessing the curriculum. Ultimately, the district's sexual health education program will ensure that in the K-12 life of a child, the sexual health education program is consistent with the *2005 Guidelines for Sexual Health and Disease Prevention*.

III. Parent/Guardian Notification and Material Review Process

One month prior to providing instruction in sexual health education, the district will notify parents of the planned instruction and that all instructional materials are available to parents/guardians for inspection. The materials will include written materials and electronically formatted materials. The opportunity for inspection will be provided at a time and place convenient for parent/guardian participation such as evenings or weekends.

IV. Excluding Student from a Program/Opt-Out

A parent/guardian who wishes to have a student excused from planned instruction in sexual health education must file a written request. The district will make the appropriate opt-out form available. Excused students will be provided with appropriate alternative educational opportunities.
